PLAGIARISM

Keep Your Work Honest

What is Plagiarism?

According to the Oxford English Dictionary, plagiarism is "the action or practice of taking someone else's work, idea, etc. and passing it off as one's own."

Let's face it...

There is no shortage of information available on the internet. With today's technology, it is super easy to find, share, and use information. It is also just as easy to plagiarize. Therefore, it is important to keep your academic work honest and make sure to give credit when credit is due.

Ways to Plagiarize

There are many different ways to plagiarize and it isn't just copying someone's work word for word. Many cases are often ambiguous. Plagiarism can be inaccurate or missing citations, mixing copied and/or paraphrased material from multiple sources, and poor paraphrasing.

Don't Forget!

Text is not the only thing that can be plagiarized. Pictures, charts, graphs, video, music, etc. should be cited.

Ways to Avoid Plagiarism

Cite Your Sources

Be sure to cite your sources whenever you quote, paraphrase, or summarize.

Don't Procrastinate

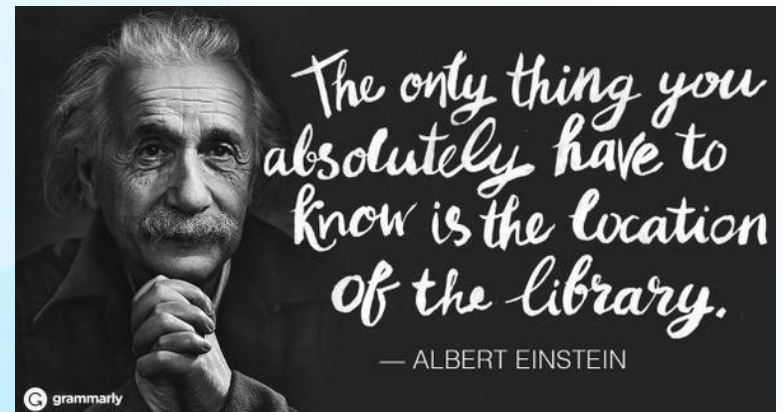

When you are in a rush, it is easy to become careless and make poor choices.

Be careful when Cutting & Pasting

Copying and pasting is a breeze with today's technology. Make sure to always cite your sources.
