Library Web Page, Fall 2009 – Fall 2012*: Percent of off Campus accesses vs Percent of CBC site enrollment

Chart represents percent of students on each campus and percent of off-campus accesses to the library web page, based on data from Registrar's enrollment reports and the library's web counter. Off campus is an access from other than our campus IP range.

>>Internet "campus" is #1 in summer 2012 & summer 2011 & #2 in Summer 2010

>>Fall 2010 is when the library changed to LibGuides, so possibly some off campus is inflated due to the library web page being discoverable through internet searching. However, finding us through search is <10% of total accesses; some search is for CBC related things, and some is just general web search.

>>Percentage doesn't round to 100% because I left off the various other sites, like schools and prisons; but schools theoretically contribute to 'off-campus' accesses and prisons, none

>>*Fall 2012 is September 1 – September 24, 2012
